

QUALITY POLICY

At COPEG we are committed to complying with the purpose of the Cooperative and Supplementary Agreements between Panama and the United States of America, through epidemiological surveillance in the field, reinforcing control measures, producing, and dispersing sterile NWS flies, to protect animal health of the region.

Maintaining a permanent effort to improve human resources and the Quality Management System, as well as consolidate the image of COPEG beyond our borders, being an international reference.

QUALITY OBJECTIVES

1. Guarantee the operation of the Permanent Biological Prevention Barrier and the efficient epidemiological surveillance in the field.
2. Develop and maintain the reaction capacity to respond, in the shortest possible time, to eradicate an eventual NWS outbreak in the free region of Panama.
3. Maintain a team of highly competent and committed professionals.
4. Maintain the satisfaction perceived by the beneficiaries.
